

CLASH 837 table

design Samuli Naamanka

Clash 837 is a beautiful and light plywood table, which can be enlarged to fit the measurements of a large conference table. Integrated metal fitting under the tabletop enables the table to be build without support frame and light weighted. The tabletop surface is available in veneer or laminate coating with distinguishable veneer edge. The legs are solid wood with metal joints. The table is also obtainable as round and in different heights. A hatch for electricity comes as an accessory.

PRODUCT DETAILS

Birch plywood tabletop
Surface veneer or laminate
Wooden legs
